Third-year BE Computer Science Engineering student focused on Python development and backend-oriented web development, seeking an internship opportunity to apply programming fundamentals and gain hands-on industry experience. **Mindset:** I believe in learning by building real projects, solving problems consistently, and improving through mistakes.

## EDUCATION

|                                                                                                           |           |
|-----------------------------------------------------------------------------------------------------------|-----------|
| <b>Bachelor of Engineering (BE) - Computer Science Engineering</b>                                        | 2024-2027 |
| <i>Sharadchandra Pawar College of Engineering &amp; Technology, Someshwarnagar, Baramati, Pune</i>        |           |
| Savitribai Phule Pune University (SPPU)   SGPA: Sem I: 7.73   Sem II: 8.14   Sem III: 8.34   Sem IV: 8.73 |           |
| <b>Higher Secondary Certificate (12th) - 80.00%</b>                                                       | Mar 2023  |
| <i>Late Sahebrao Phadtare Junior College Science, Kalamb, Tal. Indapur, Dist. Pune</i>                    |           |
| <b>Secondary School Certificate (10th) - 74.40%</b>                                                       | Feb 2021  |
| <i>Shardabai Pawar Vidyaniketan, Sharadanagar, Tal. Baramati, Dist. Pune</i>                              |           |

## TECHNICAL SKILLS

- **Programming:** Python, Java (Basics)
- **Core CS Concepts:** Data Structures & Algorithms, Object Oriented Programming, Database Management Systems, Computer Networks
- **Web Development:** HTML, CSS, JavaScript (DOM, Events, API Calls)
- **Python Core:** Python fundamentals, OOP basics
- **Tools & Version Control:** Git, GitHub, VS Code
- **Currently Learning:** Django, DSA, Backend Development

## PROJECTS

|                                                                                                                                                                                                                           |                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>Smart Campus Management System</b>                                                                                                                                                                                     | HTML, CSS, JavaScript |
| Personal portfolio project (in progress). Building a practical college-management web application with login/account, notifications, contacts and academic assignment sections; backend and database integration planned. |                       |
| <b>Student Management System</b>                                                                                                                                                                                          | Python                |
| Developed a menu-driven application to add, view, search and manage student information using Python.                                                                                                                     |                       |
| <b>Library Management System</b>                                                                                                                                                                                          | Python                |
| Developed a menu-driven application to manage books, including search, viewing available books and issued-book information.                                                                                               |                       |

## CERTIFICATION & WORKSHOP

|                                                                                                                     |                      |                   |
|---------------------------------------------------------------------------------------------------------------------|----------------------|-------------------|
| <b>30 Days Full Stack Java Workshop - Aparitech Software Company</b>                                                | <a href="#">View</a> | 02 April 2026     |
| Covered HTML, CSS, JavaScript, Core Java, JDBC, Servlets, JSP and database integration. Certificate ID: APAR260373. |                      |                   |
| <b>Digital Productivity with AI - UNICEF YuWaah</b>                                                                 | <a href="#">View</a> | 02 September 2026 |
| Successfully completed the course with a score of 90%.                                                              |                      |                   |

## ACADEMIC HIGHLIGHTS

- Consistent academic improvement from 7.73 SGPA (Sem I) to 8.73 SGPA (Sem IV)
- Completed 12th grade with 80.00% with Information Technology as a subject
- Appeared for Maharashtra State Common Entrance Test (MHT-CET)
